South Schema Migration Cheat Sheet (0.5)

Initial Import
`./manage.py startmigration appname --initial`

Create Automatic Migration
`./manage.py startmigration appname name_of_migration --auto`

Create a Model
`./manage.py startmigration appname create_country --model Country`

Create a Field
`./manage.py startmigration appname add_country_code --add-field Country.code`

Migration Methods
- `db.create_table(table_name, fields)`
- `db.delete_table(table_name, cascade=True)`
- `db.rename_table(table_name, new_table_name)`
- `db.clear_table(table_name)`
- `db.add_column(table_name, field_name, field, keep_default=True)`
- `db.delete_column(table_name, column_name)`
- `db.alter_column(table_name, column_name, field, explicit_name=True)`
- `db.rename_column(table_name, column_name, new_column_name)`
- `db.create_index(table_name, column_names, unique=False, db_tablespace="")`
- `db.delete_index(table_name, column_names, db_tablespace="")`
- `db.create_primary_key?(table_name, columns)`
- `db.delete_primary_key?(table_name)`
- `db.create_unique?(table_name, columns)`
- `db.delete_unique?(table_name, columns)`
- `db.execute(sql, params=[])`
- `db.execute_many(sql)`
- `db.send_create_signal(app_label, model_names)`
- `db.start_transaction?()`
- `db.commit_transaction?()`
- `db.rollback_transaction?()`
